Person 1: Login

Name: _____

Your files: `LoginActivity.java, activity_login.xml, User.java, UserDao.java`

Dependencies: Push User.java and UserDao.java first. Person 2's AppDatabase needs them.

Data layer

- ☐ User entity: user_id, name, username (unique), password, email, role, unit_number, landlord_id
- ☐ UserDao: insert, login, getByUsername, getLandlordByUsername, getById, countUsers

Layout: activity_login.xml

- ☐ Logo, “FixIt” wordmark and tagline above a white card
- ☐ etUsername, etPassword (textPassword), btnLogin and clickable tvGoSignup

Behavior

- ☐ Empty field: toast “Please fill in all fields”
- ☐ Wrong credentials: toast “Username or password is incorrect”
- ☐ Success saves user id and role to SharedPreferences and opens the right home screen
- ☐ Sign Up link opens SignupActivity
- ☐ Demo accounts and requests are created when the database is empty

Before you push

- ☐ Only my own files are changed
- ☐ Colors, buttons and title bar follow the shared styles (themes.xml)
- ☐ No hardcoded pixel sizes (use dp and sp)
- ☐ Tested in portrait and took a screenshot for the report
- ☐ git pull --rebase, then git push to main

Person 2: Sign Up

Name: _____

Your files: `SignupActivity.java, activity_signup.xml, AppDatabase.java, build.gradle`

Dependencies: AppDatabase needs User/UserDao (Person 1) and Request/RequestDao (Person 4).

Database and build

- ☐ build.gradle has Room, RecyclerView and CardView dependencies
- ☐ AppDatabase lists both entities, exposes both DAOs, is a singleton
- ☐ AppDatabase version 3 with the 2→3 migration

Layout: activity_signup.xml

- ☐ etName, etSignupUsername, etEmail, etSignupPassword, etUnit, etLandlordUsername
- ☐ RadioGroup rbTenant (default) / rbLandlord, btnSignup, Back button at the bottom-left

Behavior

- ☐ All fields required (unit and landlord username only for tenants)
- ☐ Email must contain “@”: toast “Enter a valid email”
- ☐ Password must start with a letter and have 4 letters and 3 numbers: toast “Password must start with a letter and have at least 4 letters and 3 numbers”
- ☐ Username must be unique: toast “Username already taken”
- ☐ Unknown landlord username: toast “Landlord not found”
- ☐ Success inserts the user, shows “Account created” and returns to Login
- ☐ Unit and landlord fields are hidden for landlords

Before you push

- ☐ Only my own files are changed
- ☐ Colors, buttons and title bar follow the shared styles (themes.xml)
- ☐ No hardcoded pixel sizes (use dp and sp)
- ☐ Tested in portrait and took a screenshot for the report
- ☐ git pull --rebase, then git push to main

Person 3: Tenant Home

Name: _____

Your files: `TenantHomeActivity.java, activity_tenant_home.xml, RequestAdapter.java, item_request.xml`

Dependencies: Needs Request, RequestDao (Person 4) and the shared colors and styles.

Layout

- ☐ Green title bar “My Requests”, centered welcome line, request list, empty message
- ☐ + New Request and Logout pinned at the bottom; the page scrolls
- ☐ item_request.xml card with title, description (2 lines), date, status badge

Behavior

- ☐ “Welcome back, name” uses the user's name
- ☐ Shows only the logged-in tenant's requests; refreshes when returning to the screen
- ☐ Status badge: Pending orange, Done green, Rejected red
- ☐ Tapping a Pending request opens the edit form
- ☐ Tapping a Rejected request shows a dialog with the reasons
- ☐ Tapping a Done request shows “Completed requests can't be edited”
- ☐ Logout clears the saved user and returns to Login

Before you push

- ☐ Only my own files are changed
- ☐ Colors, buttons and title bar follow the shared styles (themes.xml)
- ☐ No hardcoded pixel sizes (use dp and sp)
- ☐ Tested in portrait and took a screenshot for the report
- ☐ git pull --rebase, then git push to main

Person 4: New Request

Name: _____

Your files: `NewRequestActivity.java, activity_new_request.xml, Request.java, RequestDao.java`

Dependencies: Push Request.java and RequestDao.java early. Person 2's AppDatabase needs them.

Data layer

- ☐ Request: request_id, tenant_id, title, description, status, created_at, reject_reasons
- ☐ Statuses: Pending, Done, Rejected; the reject reasons checklist constants
- ☐ RequestDao: insert, update, delete, getAll, getByTenant, getForLandlord, getById

Behavior

- ☐ Both fields required: toast “Please fill in all fields”
- ☐ New request is saved as Pending with the current time and the tenant's id
- ☐ Sends the NEW_REQUEST broadcast after saving; toast “Request submitted”
- ☐ Edit mode (opened with request_id): form is filled in, button reads Save Changes
- ☐ Delete Request asks for confirmation; edit and delete only work while Pending
- ☐ Back button at the bottom-left

Before you push

- ☐ Only my own files are changed
- ☐ Colors, buttons and title bar follow the shared styles (themes.xml)
- ☐ No hardcoded pixel sizes (use dp and sp)
- ☐ Tested in portrait and took a screenshot for the report
- ☐ git pull --rebase, then git push to main

Person 5: Landlord Home

Name: _____

Your files: `LandlordHomeActivity.java, activity_landlord_home.xml, NewRequestReceiver.java`

Dependencies: Needs Request and RequestDao (Person 4) and the request row from Person 3.

Layout

- ☐ Green title bar “All Requests”, centered welcome line, request list, empty message
- ☐ Logout pinned at the bottom; the page scrolls

Behavior

- ☐ Shows only requests from the landlord's own tenants, Pending first
- ☐ Each row shows the tenant's unit number and a status badge (incl. Rejected)
- ☐ Tapping a row opens RequestDetailActivity with request_id
- ☐ Refreshes when a new request arrives and when returning to the screen
- ☐ Notification channel and notification; permission requested on Android 13+

Before you push

- ☐ Only my own files are changed
- ☐ Colors, buttons and title bar follow the shared styles (themes.xml)
- ☐ No hardcoded pixel sizes (use dp and sp)
- ☐ Tested in portrait and took a screenshot for the report
- ☐ git pull --rebase, then git push to main

Person 6: Request Detail

Name: _____

Your files: `RequestDetailActivity.java, activity_request_detail.xml, AndroidManifest.xml, testing`

Dependencies: Needs everyone's activity names to finalize the manifest.

Layout

- ☐ Title bar with the request title, status badge, submitted date
- ☐ Request card (unit, description) and Tenant info card with the + button
- ☐ Mark as Done, Reject Request, Contact Tenant; Back button at the bottom-left

Behavior

- ☐ Loads the request from request_id
- ☐ + shows tenant name, unit and email; − hides them
- ☐ Mark as Done / Mark as Pending / Reopen Request updates the status
- ☐ Reject Request opens the reasons checklist; at least one reason is required
- ☐ A rejected request shows a reasons card
- ☐ Contact Tenant opens an email to the tenant with the title as subject

Manifest and testing

- ☐ AndroidManifest.xml registers all activities, the receiver, icon and mailto queries
- ☐ Run the manual test plan in PROJECT_DOCUMENTATION (T1 to T21)
- ☐ Screenshots of every screen collected for the report

Before you push

- ☐ Only my own files are changed
- ☐ Colors, buttons and title bar follow the shared styles (themes.xml)
- ☐ No hardcoded pixel sizes (use dp and sp)
- ☐ Tested in portrait and took a screenshot for the report
- ☐ git pull --rebase, then git push to main
