Person 1: Login

Name: _____

Your files: `LoginActivity.java, activity_login.xml, User.java, UserDao.java`

Dependencies: Push User.java and UserDao.java first. Person 2's AppDatabase needs them, and Person 2 and Person 6 rely on the email column.

Data layer

- ☐ User entity has user_id, name, username, password, email, role, unit_number
- ☐ UserDao has insert, login, getByUsername and getById
- ☐ User and UserDao pushed to main early

Layout: activity_login.xml

- ☐ Title TextView "FixIt"
- ☐ etUsername and etPassword (inputType textPassword)
- ☐ btnLogin and clickable tvGoSignup "Don't have an account? Sign Up"

Behavior

- ☐ Empty field shows toast "Please fill in all fields"
- ☐ Wrong credentials show toast "Username or password is incorrect"
- ☐ Success saves user id and role to SharedPreferences
- ☐ Opens Tenant Home or Landlord Home by role (explicit intent)
- ☐ Sign Up link opens SignupActivity

Before you push

- ☐ Only my own files are changed
- ☐ Pending is orange and Done is green, same button style and font sizes as the rest of the app
- ☐ No hardcoded pixel sizes (use dp and sp)
- ☐ Tested in portrait and took a screenshot for the report
- ☐ git pull --rebase, then git push to main
- ☐ Told the team in the group chat

Person 2: Sign Up

Name: _____

Your files: `SignupActivity.java, activity_signup.xml, AppDatabase.java, build.gradle`

Dependencies: AppDatabase needs Person 1's User/UserDao and Person 4's Request/RequestDao to exist first. Start with placeholders if they are not pushed yet.

Database and build

- ☐ build.gradle has the Room and RecyclerView dependencies
- ☐ AppDatabase lists the User and Request entities and exposes both DAOs
- ☐ AppDatabase is a singleton (getInstance)

Layout: activity_signup.xml

- ☐ etName, etSignupUsername, etEmail (textEmailAddress), etSignupPassword (textPassword), etUnit
- ☐ RadioGroup with rbTenant (default) and rbLandlord
- ☐ btnSignup

Behavior

- ☐ All fields required, otherwise toast "Please fill in all fields"
- ☐ Email must contain "@", otherwise toast "Enter a valid email"
- ☐ Username must be unique, otherwise toast "Username already taken"
- ☐ Success inserts the User into Room, shows "Account created" and returns to Login
- ☐ Unit number field is hidden or disabled when Landlord is selected
- ☐ Agree with Person 1 on removing the demo accounts from LoginActivity

Before you push

- ☐ Only my own files are changed
- ☐ Pending is orange and Done is green, same button style and font sizes as the rest of the app
- ☐ No hardcoded pixel sizes (use dp and sp)
- ☐ Tested in portrait and took a screenshot for the report
- ☐ git pull --rebase, then git push to main
- ☐ Told the team in the group chat

Person 3: Tenant Home

Name: _____

Your files: `TenantHomeActivity.java, activity_tenant_home.xml, RequestAdapter.java, item_request.xml`

Dependencies: Push RequestAdapter and item_request.xml early. Person 5's Landlord Home reuses them.

Layout: activity_tenant_home.xml

- ☐ Title "My Requests"
- ☐ RecyclerView rvRequests
- ☐ tvEmpty "No requests yet", shown only when the list is empty
- ☐ btnNewRequest ("+ New Request")
- ☐ Logout button or menu item

Row: item_request.xml

- ☐ CardView containing tvTitle (bold), tvDesc (max 2 lines), tvDate, tvStatus
- ☐ Pending is orange and Done is green
- ☐ Agree with Person 5 on tvUnit for the landlord list

Behavior

- ☐ RequestAdapter binds Request fields to the row
- ☐ Shows only the logged-in tenant's requests (user id from SharedPreferences)
- ☐ List refreshes when you come back from New Request
- ☐ "+ New Request" opens NewRequestActivity (explicit intent)
- ☐ Logout clears the saved user and returns to Login

Before you push

- ☐ Only my own files are changed
- ☐ Pending is orange and Done is green, same button style and font sizes as the rest of the app
- ☐ No hardcoded pixel sizes (use dp and sp)
- ☐ Tested in portrait and took a screenshot for the report
- ☐ git pull --rebase, then git push to main
- ☐ Told the team in the group chat

Person 4: New Request

Name: _____

Your files: `NewRequestActivity.java, activity_new_request.xml, Request.java, RequestDao.java`

Dependencies: Push Request.java and RequestDao.java first. Person 2's AppDatabase needs them.

Data layer

- ☐ Request entity with id, tenant_id, title, description, date, status
- ☐ RequestDao has insert, update, get by tenant, get all (Pending first) and get by id
- ☐ Request and RequestDao pushed to main early

Layout: activity_new_request.xml

- ☐ Title "Submit a Request"
- ☐ etTitle (single line) and etDescription (multiline, about 4 lines)
- ☐ btnSubmit

Behavior

- ☐ Both fields required, otherwise toast "Please fill in all fields"
- ☐ Inserts the Request with status "Pending", current date and tenant_id of the logged-in user
- ☐ Sends the local broadcast for the landlord
- ☐ Shows "Request submitted" and closes the screen
- ☐ No unit number field (it comes from the tenant's account)

Before you push

- ☐ Only my own files are changed
- ☐ Pending is orange and Done is green, same button style and font sizes as the rest of the app
- ☐ No hardcoded pixel sizes (use dp and sp)
- ☐ Tested in portrait and took a screenshot for the report
- ☐ git pull --rebase, then git push to main
- ☐ Told the team in the group chat

Person 5: Landlord Home

Name: _____

Your files: `LandlordHomeActivity.java, activity_landlord_home.xml, NewRequestReceiver.java`

Dependencies: Needs Person 3's RequestAdapter and row layout, and Person 4's Request and RequestDao.

Layout: activity_landlord_home.xml

- ☐ Title "All Requests"
- ☐ RecyclerView rvAllRequests using the same row layout as Tenant Home
- ☐ tvEmpty message
- ☐ Logout button or menu item

Behavior

- ☐ Shows requests from all tenants, Pending first
- ☐ Each row shows the tenant's unit number
- ☐ Tapping a row opens RequestDetailActivity and passes request_id (explicit intent)
- ☐ Logout clears the saved user and returns to Login

Receiver and notification

- ☐ NewRequestReceiver registered so the list refreshes when a new request arrives
- ☐ Notification channel created and a notification shown
- ☐ Notification permission requested on Android 13 and above

Before you push

- ☐ Only my own files are changed
- ☐ Pending is orange and Done is green, same button style and font sizes as the rest of the app
- ☐ No hardcoded pixel sizes (use dp and sp)
- ☐ Tested in portrait and took a screenshot for the report
- ☐ git pull --rebase, then git push to main
- ☐ Told the team in the group chat

Person 6: Request Detail

Name: _____

Your files: `RequestDetailActivity.java, activity_request_detail.xml, AndroidManifest.xml, end-to-end testing`

Dependencies: Needs everyone's activity names to finalize the manifest. Start with placeholders.

Layout: activity_request_detail.xml

- ☐ tvDetailTitle (large), tvDetailUnit, tvDetailDate, tvDetailDesc, tvDetailStatus
- ☐ btnToggleStatus ("Mark as Done / Mark as Pending")
- ☐ btnContact ("Contact Tenant")

Behavior

- ☐ Loads the request using the request_id from the intent
- ☐ Toggle updates the status in Room and refreshes the text and color
- ☐ Contact sends ACTION_SENDTO with a mailto: URI, the tenant's email and the request title as subject

Manifest and testing

- ☐ AndroidManifest.xml registers all activities and the receiver, with the final class names
- ☐ End-to-end test: signup, login, submit request, landlord sees it, mark done
- ☐ Portrait screenshots of every screen collected for the report

Before you push

- ☐ Only my own files are changed
- ☐ Pending is orange and Done is green, same button style and font sizes as the rest of the app
- ☐ No hardcoded pixel sizes (use dp and sp)
- ☐ Tested in portrait and took a screenshot for the report
- ☐ git pull --rebase, then git push to main
- ☐ Told the team in the group chat
